

Lower Langdon new town: 5,000 homes beside Langdon Ridge SSSI

- PROPOSED NEW TOWN (Policy SS18):** 5,000 homes on 250 hectares of Green Belt
- LANGDON RIDGE SSSI:** nationally protected grassland, woodland and wildlife. Its south-facing slopes, the key habitat for which it was designated, look straight down onto the new town
- IMPACT RISK ZONE:** Natural England's buffer where building of this size may harm the SSSI. It covers the towns too: the SSSI was designated in 2019, after they were built, and the Green Belt between them has kept it protected from them
- Main roads**
